Descriptive List
of
Outstanding Gladiolus

EVERETT A. QUACKENBUSH
New Cumberland, Pa.

GREETINGS

We appreciate greatly the many fine orders received last year from our customers, both old and new. Our business far exceeded that of any previous year. Our only regret is that we were unable to fill late orders for many varieties. We suggest that you try to place your orders early this year, before February 15 if possible, as numerous varieties will likely be sold out by that time.

As the boys are still with the Armed Forces, in the Middle East and in the South Pacific, the chief responsibility for producing the bulb crop has been carried by Helen and Dot. Although handicapped by one of the driest growing seasons on record, they have produced a fine crop. The percentage of large sizes is not as high as in some years, but the bulbs are firm and of fine quality. We believe you will be pleased with them.

NEW LOCATION

For the benefit of those who may desire to visit our fields, we announce that we will be growing at a new location during the summer of 1945. We have purchased a farm located about two miles south of Middletown, Pa., on Route 441 and will be growing our gladiolus there next summer. You are invited to visit our plantings there. The glads will be in bloom during July, August and September. The greatest number of different varieties will likely be in bloom during the middle of August. As Middletown is in the Harrisburg area, we are remaining in the same general locality. Until notified otherwise, you should continue to address us at New Cumberland, Pa.

GLADIOLUS DURING THE WAR

During the critical period through which we are passing it is even more necessary than in normal times that we have some source to which we can turn from time to time for relief from the nervous tension under which we live. A garden, perhaps better than any other thing, serves to furnish this needed mental and physical relaxation. Gladiolus, because of the ease with which they may be grown, their infinite varieties of form and color, their great beauty and their usefulness as cut flowers, make an ideal garden flower. Even though yours is a victory garden, intended principally for the production of food, its value can be greatly enhanced by including some gladiolus to add a touch of color to the garden and to furnish beautiful flowers for use in your own home and to share with your friends.

JOIN A GLADIOLUS SOCIETY

Persons interested in the growing of gladiolus, should join a society. The benefits and information received are worth much more than the dues. Some of the societies issue regular publications such as bulletins and year books. Others conduct trial gardens and issue reports on the varieties grown. They all conduct shows.

VARIETIES

In our opinion, each variety listed in our catalog has merit and is worthy of your consideration. As to whether you will like a particular variety may depend on your personal preferences and the purpose for which you wish to use the flowers. Remember that the price is not an indication of the quality of the variety. Newer kinds must of necessity be higher in price because of scarcity of stock. We suggest that beginners start with tried and true varieties in order to avoid disappointment. Growers of more experience and fanciers will want to try the newer ones.

OUR GUARANTEE

All our stock is guaranteed to be healthy, vigorous, free from thrips, and true to name. **You must be satisfied.** If any stock is unsatisfactory, tell us and we will try to satisfy you. If you like our bulbs and our service, tell your friends.

PLEASE READ CAREFULLY

All quotations are subject to previous sale. Due to increased costs of labor and all the other items of expense it has been necessary to increase our prices on most of the older varieties. However, our prices on most of the newer varieties have been reduced. We urge that you place your orders early so that you may not be disappointed. Each year we are unable to fill late orders for a number of varieties. Orders are segregated as soon as possible after being received but will not be shipped until after danger of freezing is past, unless you request otherwise. However, bulbs can be sent any time desired. No substitutions will be made without your permission. If we are out of a variety you order, your money will be refunded unless you give us permission to make a substitution in size or variety. Cultural directions will be included with all orders.

Orders from the retail list amounting to \$2.00 or more will be prepaid to points in the United States. We prefer not to receive orders amounting to less than \$2.00. If such orders are sent, please include a fee of 15 cents to cover the cost of postage and packing. Prices as indicated in the quantity list are not prepaid, but are F. O. B. New Cumberland, Pennsylvania. If you wish to order part from the retail list and part from the quantity list, we will send the order transportation collect and will include extras or overcounts to make up for the transportation on the retail items. A discount of 5% will be allowed on cash orders from the retail list amounting to from \$3.00 to \$10.00. On such orders amounting to more than \$10.00 a discount of 10% will be allowed. These discounts do not apply to mixtures, to items marked "no discount" nor to orders from the quantity price list. We also include worthwhile extras with retail orders. The value of the extras will be in proportion to the size of the order. Suggest varieties desired as extras. If we have sufficient stock we will comply with your request. However, new introductions and varieties marked "no discount" can not be used as extras.

Where a variety is listed at 2 for 20 cents or 2 for 25 cents, please do not order a smaller number at a lower price. Five bulbs will be sold at one-half the price of ten, but no single item will be accepted for less than 20 cents except when so quoted. Where no 10 price is indicated, it may be found by multiplying the price of a single bulb by 8.

Where bulblets are sold by the packet, 25 to 50 or more will be included in each packet. We will give good value.

Do not ask for special quotations unless you have a large order. Our prices are very low for the high quality bulbs offered. However, we are glad to furnish special quotations to jobbers, growers, and others purchasing in large quantities.

All bulbs listed as large size are 1¼ inches and up, mostly 1½ inches and up, in diameter. Medium size bulbs are ¾ to 1¼ inches in diameter. Small bulbs are ¼ to ¾ inches in diameter. For the finest blooms, large bulbs are best. Medium size bulbs of most varieties will give nice cut flowers, but the spikes are not as long as from large bulbs. Although small bulbs of many varieties will bloom, others will not. The blooms from small bulbs will be noticeably smaller in size. Bulblets seldom bloom and are often difficult or impossible to germinate. We do not recommend them except to experienced growers.

1945 INTRODUCTIONS

From Byron R. Kadel.

VOODOO (Kadel). (Picardy x Pfitzers Triumph) X Bagdad. A very large intensely ruffled and fluted smoky plum colored variety that can win in its class. A close examination shows the color to be violet red etched on a cream background. However, the general impression as you stand off and look at the flower is that it is plum color. It opens 6 or 7 blooms at a time. It is a tall strong grower which produces plenty of bulblets that germinate well. The bottom floret measures 6 inches and it holds its size well as it blooms up the spike. It blooms in from 75 to 83 days after planting, depending on the conditions under which the bulbs have been stored.

If you like smokies or if you want to show in the smoky class you should try this variety. It was granted the American Home Achievement Award in 1943. It has been exhibited only three times but it has won three blue ribbons. See cut on the front cover page.

Price, \$2.00 for any size bulb. 10 for \$16.00. Bulblets, \$.30 each, 10 for \$2.50.

From Arthur A. Arenius.

PIONEER (LaSalle). Arthur Arenius is introducing the variety for Mr. LaSalle and has permitted me to list it. He states, "Undoubtedly the best pink that I have seen." Arthur knows his glads, therefore, this statement is significant. It is especially so since he is the man who introduced Connecticut Yankee last year and we know that variety to be a great pink. His description of Pioneer follows: "Deep salmon pink, blending to a cream throat. Grows easily 5½ feet tall, 6-inch blooms, formal placement with 6 to 8 open on an 18-bud spike. Always straight. Plant very large with wide, heavy foliage. Most large glads are inclined to be coarse, but this variety has refinement and a very beautiful clean color. Makes large bulblets which germinate readily and grow to more than average size. Mid-season."

I have not grown this variety myself but I have faith in Arthur's judgment, and on this basis will invest money in stock of the variety as I did in Connecticut Yankee.

Price, \$2.00 per bulb for any size.

1944 INTRODUCTION

JOURNEY'S END (Kadel). The happy blend of two great glads, Picardy x Pfitzer's Triumph. Opens 5 to 6 six-inch florets with 5 additional buds showing color on a 19-bud spike. The color is a deep salmon pink, blending to a deeper throat and to lighter petal margins. It will win on the show table, florists will pay a premium price for the blooms and Mr. Kadel states that it is a promising parent. As a seedling it was given an award at the New York World's Fair; Champion Seedling at Havre de Grace in 1941; American Home Achievement Medal at Wheeling, W. Va., in 1942; and as a named variety was 1st in its color class (3 spikes) at the Maryland State Show in 1943 and in 1944.

Price, large bulbs only, \$2.50 each. Bulblets, 1 for \$.50, 10 for \$4.00.

PREVIOUS INTRODUCTIONS

FLORA FARMER (Quackenbush). A beautiful radiant, deep pure pink, with a creamy throat. Opens 5 to 8 large ruffled florets at a time. Nearly all of the buds show strong color at the time the first floret opens, which adds greatly to its value as a commercial cut flower. Placement and attachment of florets excellent. Introduced in 1939, it has already won numerous blue ribbons and will win many more as stock becomes more plentiful. Since large bulbs often produce two or three spikes, all eyes but one should be cut out when growing for exhibition purposes. (85 days.)

INTERMEZZO (Quackenbush) (Minuet x Picardy). Clear cream without markings except that a faint dusting of violet rose, very deep, gives a warm tone to the throat. The florets, somewhat similar to those of Minuet, are wide open, pointed and reflexed. Opens 5 to 8 five-inch florets. Has 18 to 20 buds on spike which never

crooks. Placement and attachment are excellent. The type is informal. Intermezzo is strong and healthy and is a tall grower, 52 to 55 inches or more. It blooms from any size bulb and when cut, opens up well in water. Having excellent substance and great decorative value, we believe it will prove to be a fine commercial. On the show table it will do well in its class. It makes plenty of bulblets which germinate readily and grow strongly. As Seedling 3513, given Award of Merit, West Virginia Society trial garden 1940. Award of Merit, Empire State Society, 1941. Best seedling spike in the show, Pennsylvania Society Show, Johnstown, Pa., 1941. (90 days).

MARION PEARL (Benedict) (Pearl of California x Picardy). This large formal type gladiolus is light salmon in color shading to a lighter throat, without markings. It opens up to nine florets at a time on a 55-inch spike which does not crook and which carries from 18 to 21 buds. It has wide open, somewhat ruffled, 6-inch florets which stand heat well. Because of the size of the florets and the large number open it has great possibilities as a show flower. In addition, it is most promising as a commercial cut flower. Its only apparent fault is that the lower floret is sometimes misplaced. Granted N. E. G. S. Award of Merit 1942. We helped to introduce this variety in 1943. Only large and medium bulbs are offered for sale. Sales will be limited to 10 bulbs to a customer.

MOTHER KADEL (Kadel) (Picardy x Spray of Gold) Medium yellow, slightly deeper in color than Mary Damaris. Entirely clear self color without marking or the slightest bit of foreign color even in its deepest throat. Opens 5 to 7 florets with 5 additional buds showing color. It makes a tall spike which does not crook. Placement and attachment are excellent. When cut it opens up well and is a good keeper. It is the best commercial cut flower yellow that we have seen. We helped introduce this variety for Mr. Kadel in 1941. While this variety has made a great record as a show flower, it will make even greater achievements as a commercial cut flower. Award of Merit, Maryland trial garden, 1942. (90 days.)

PINK RADIANCE (Quackenbush) (Picardy x Minuet). Pure light pink without marking except a very inconspicuous touch of carmine deep in the throat. Six to eight wide open florets of good size on a tall spike which never crooks. The spike is graceful. Excellent placement and attachment. Sixteen to eighteen buds. It is a vigorous grower, producing plenty of bulblets which germinate well. Introduced in 1941. It will go far as a show flower. However, its greatest potential value is as a commercial cut flower. It makes nice spikes from any size bulb, and opens up well in water when cut. Award of Merit at West Virginia trial garden 1941 and by E. S. G. S. in 1942. The blooming period is 90 days.
